

PLANT RELEASE

In order to properly fumigate (tent) your structure, there is the possibility of plant damage due to the heavy foliage that currently exists within 18" of the exterior perimeter of the structure. Although the utmost care will be taken, plant damage can/will occur. Roadrunner Exterminating, Inc. and the fumigation company will not assume liability for such damage as a result of the fumigation (tent) process.

To lessen the possibility of such damage, it is suggested that foliage is cut back at least 18" from the structure to be fumigated and the soil is soaked the evening before the fumigation process.

WARNING

Due to the (tent) fumigation process, plant damage can/will occur!

I/we will not hold Roadrunner Exterminating, Inc. or the fumigation company liable for plant damage, shrubbery foliage, etc. during the course of work at the property located at: _____

Date: _____

Agent/Owner Signature: _____
